## SECTION B. COGNITIVE PATTERNS

|                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-----------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. MEMORY RECALL ABILITY                      | (Code for recall of what was learned or known)<br>0. Memory OK 1. Memory problem<br>a. Short-term memory OK — seems/appears to recall after 5 minutes<br>b. Procedural memory OK—Can perform all or almost all steps in a multitask sequence without cues for initiation                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 2. COGNITIVE SKILLS FOR DAILY DECISION-MAKING | a. How well client made decisions about organizing the day (e.g., when to get up or have meals, which clothes to wear or activities to do)<br>0. INDEPENDENT—Decisions consistent/reasonable/safe<br>1. MODIFIED INDEPENDENCE—Some difficulty in new situations only<br>2. MINIMALLY IMPAIRED—In specific situations, decisions become poor or unsafe and cues/supervision necessary at those times<br>3. MODERATELY IMPAIRED—Decisions consistently poor or unsafe, cues/supervision required at all times<br>4. SEVERELY IMPAIRED—Never/rarely made decisions<br>b. Worsening of decision making as compared to status of 90 DAYS AGO (or since last assessment if less than 90 days)<br>0. No 1. Yes |
| 3. INDICATORS OF DELIRIUM                     | a. Sudden or new onset/change in mental function over LAST 7 DAYS (including ability to pay attention, awareness of surroundings, being coherent, unpredictable variation over course of day)<br>0. No 1. Yes<br>b. In the LAST 90 DAYS (or since last assessment if less than 90 days), client has become agitated or disoriented such that his or her safety is endangered or client requires protection by others<br>0. No 1. Yes                                                                                                                                                                                                                                                                    |

## SECTION C. COMMUNICATION/HEARING PATTERNS

|                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|-------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. HEARING                                      | (With hearing appliance if used)<br>0. HEARS ADEQUATELY—Normal talk, TV, phone, doorbell<br>1. MINIMAL DIFFICULTY—When not in quiet setting<br>2. HEARS IN SPECIAL SITUATIONS ONLY—Speaker has to adjust tonal quality and speak distinctly<br>3. HIGHLY IMPAIRED—Absence of useful hearing                                                                                                                                                 |
| 2. MAKING SELF UNDERSTOOD (Expression)          | (Expressing information content—however able)<br>0. UNDERSTOOD—Expresses ideas without difficulty<br>1. USUALLY UNDERSTOOD—Difficulty finding words or finishing thoughts BUT if given time, little or no prompting required<br>2. OFTEN UNDERSTOOD—Difficulty finding words or finishing thoughts, prompting usually required<br>3. SOMETIMES UNDERSTOOD—Ability is limited to making concrete requests<br>4. RARELY/NEVER UNDERSTOOD      |
| 3. ABILITY TO UNDERSTAND OTHERS (Comprehension) | (Understands verbal information—however able)<br>0. UNDERSTANDS—Clear comprehension<br>1. USUALLY UNDERSTANDS—Misses some part/intent of message, BUT comprehends most conversation with little or no prompting<br>2. OFTEN UNDERSTANDS—Misses some part/intent of message; with prompting can often comprehend conversation<br>3. SOMETIMES UNDERSTANDS—Responds adequately to simple, direct communication<br>4. RARELY/NEVER UNDERSTANDS |
| 4. COMMUNICATION DECLINE                        | Worsening in communication (making self understood or understanding others) as compared to status of 90 DAYS AGO (or since last assessment if less than 90 days)<br>0. No 1. Yes                                                                                                                                                                                                                                                            |

## SECTION D. VISION PATTERNS

|                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. VISION                         | (Ability to see in adequate light and with glasses if used)<br>0. ADEQUATE—Sees fine detail, including regular print in newspapers/books<br>1. IMPAIRED—Sees large print, but not regular print in newspapers/books<br>2. MODERATELY IMPAIRED—Limited vision; not able to see newspaper headlines, but can identify objects<br>3. HIGHLY IMPAIRED—Object identification in question, but eyes appear to follow objects<br>4. SEVERELY IMPAIRED—No vision or sees only light, colors, or shapes; eyes do not appear to follow objects |
| 2. VISUAL LIMITATION/DIFFICULTIES | Saw halos or rings around lights, curtains over eyes, or flashes of lights<br>0. No 1. Yes                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 3. VISION DECLINE                 | Worsening of vision as compared to status of 90 DAYS AGO (or since last assessment if less than 90 days)<br>0. No 1. Yes                                                                                                                                                                                                                                                                                                                                                                                                             |

## SECTION E. MOOD AND BEHAVIOR PATTERNS

|                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. INDICATORS OF DEPRESSION, ANXIETY, SAD MOOD | <p>(Code for observed indicators irrespective of the assumed cause)</p> <p>0. Indicator not exhibited in last 3 days<br/>1. Exhibited 1-2 of last 3 days<br/>2. Exhibited on each of last 3 days</p> <p><b>a. A FEELING OF SADNESS OR BEING DEPRESSED</b>, that life is not worth living, that nothing matters, that he or she is of no use to anyone or would rather be dead</p> <p><b>b. PERSISTENT ANGER WITH SELF OR OTHERS</b>—e.g., easily annoyed, anger at care received</p> <p><b>c. EXPRESSIONS OF WHAT APPEAR TO BE UNREALISTIC FEARS</b>—e.g., fear of being abandoned, left alone, being with others</p> <p><b>d. REPETITIVE HEALTH COMPLAINTS</b>—e.g., persistently seeks medical attention, obsessive concern with body functions</p> <p><b>e. REPETITIVE ANXIOUS COMPLAINTS, CONCERNS</b>—e.g., persistently seeks attention/reassurance regarding schedules, meals, laundry, clothing, relationship issues</p> <p><b>f. SAD, PAINED, WORRIED FACIAL EXPRESSIONS</b>—e.g., furrowed brows</p> <p><b>g. RECURRENT CRYING, TEARFULNESS</b></p> <p><b>h. WITHDRAWAL FROM ACTIVITIES OF INTEREST</b>—e.g., no interest in long standing activities or being with family/friends</p> <p><b>i. REDUCED SOCIAL INTERACTION</b></p> |
| 2. MOOD DECLINE                                | <p>Mood indicators have become worse as compared to status of <b>90 days ago</b> (or since last assessment if less than 90 days)<br/>0. No 1. Yes</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 3. BEHAVIORAL SYMPTOMS                         | <p>Instances when client exhibited behavioral symptoms. If EXHIBITED, ease of altering the symptom when it occurred.</p> <p>0. Did not occur in last 3 days<br/>1. Occurred, easily altered<br/>2. Occurred, not easily altered</p> <p><b>a. WANDERING</b>—Moved with no rational purpose, seemingly oblivious to needs or safety</p> <p><b>b. VERBALLY ABUSIVE BEHAVIORAL SYMPTOMS</b>—Threatened, screamed at, cursed at others</p> <p><b>c. PHYSICALLY ABUSIVE BEHAVIORAL SYMPTOMS</b>—Hit, shoved, scratched, sexually abused others</p> <p><b>d. SOCIALLY INAPPROPRIATE/DISRUPTIVE BEHAVIORAL SYMPTOMS</b>—Disruptive sounds, noisiness, screaming, self-abusive acts, sexual behavior or disrobing in public, smears/throws food/feces, rummaging, repetitive behavior, rises early and causes disruption</p> <p><b>e. RESISTS CARE</b>—Resisted taking medications/injections, ADL assistance, eating, or changes in position</p>                                                                                                                                                                                                                                                                                                     |
| 4. CHANGES IN BEHAVIOR SYMPTOMS                | <p>Behavioral symptoms have become worse or are less well tolerated by family as compared to <b>90 DAYS AGO</b> (or since last assessment if less than 90 days)<br/>0. No, or no change in behavioral symptoms 1. Yes</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## SECTION F. SOCIAL FUNCTIONING
